# *Agenda*

✔ **Quality Test & Evaluation (QT&E) Results**

     ✔ **Issues**

     ✔ **Impact**

     ✔ **Resolutions**

✔ **V4.1.e  Upgrade Status**

# *Quality Test and Evaluation*
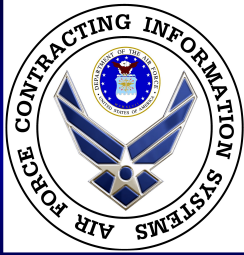

- ✔ **QT&E**
  - ✔ **2-15  Mar 02 (two weeks)**
  - ✔ **Four sites began the 4.1e upgrade Mar 2, 2002**
    - ✔ *McConnell AFB – ACC*
    - ✔ *Hurlburt AFB – AFSOC*
    - ✔ *Kaiserslautern – USAFE*
    - ✔ *Robins AFB – AFMC*
  - ✔ **One site began the 4.1e upgrade Mar 9, 2002**
    - ✔ *Randolph 12th CONS – AETC*

✔ **Four issues:**

    ✔ *FPDS / SR06*

    ✔ *RECON*

    ✔ *SPS-I*

    ✔ *ABSS*

✔ **_Issue:_** **_Service Release (SR06) was applied during the upgrade process. FPDS engine software had not been loaded. This required sites to revert to 4.1b and reapply the upgrade with SR05._**

✔**_Impact_**: **_The re-accomplishment of the upgrade caused each site a minimum loss of two production days._**

✔ **_Resolution:_** **_PMO requested AMS place SR05 back in AMS Software Library for AF_**
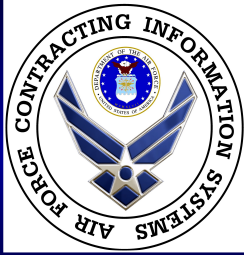

5
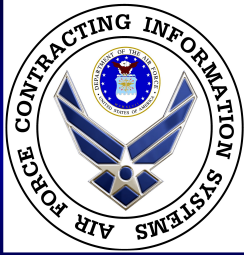

✔ **<u>Issue:</u>** *The RECON (reconciliation) file for the D035 and SBSS interfaces processes for approximately one hour then halts without aborting.*

✔ **<u>Impact:</u>** *Causes PD2 database to lock and all currently connected users to lose all data not saved.*

✔ **<u>Resolution</u>: *AMS to correct problem. Temporary workaround – do not process RECON file until SPS-I code fixed.*
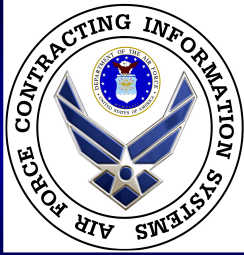

✔ **<u>Issue:</u>** *SPS-I interpretation of the incoming ABSS interface file. SPS-I doesn't populate the short description.*

✔ **<u>Impact:</u>** *Buyers must manually enter the short description; thus increasing work-load.*

✔**<u>Resolution</u>**: *Develop script to populate the short description. The Air Force will use this script until the release of the Universal SPS-I Engine in version 4.2.*
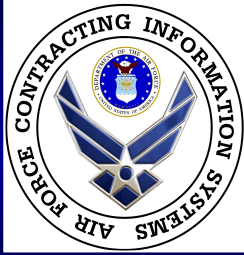

# Issue 4 : ABSS

✔ **_Issue:_** On PRs with multiple line items, ABSS changes the quantity of all line items to the quantity listed on the last line item. This also adjusts the funding accordingly.

✔ **_Impact:_** Incorrect data sent to SPS-I creates incorrect PRs in PD². Cannot deploy PD² version 4.1e until issue resolved.

✔ **_Resolution_**: Develop patch to correct ABSS.

✔ *ABSS test Beta Patch at their lab. (27- 29 Mar)*

✔ *ABSS PMO send Beta Patch to ABSS test sites.(1-5Apr)*

   ✔ *Test sites are: Robins, Eglin, Brooks, and WPAFB*

✔ *AF users receive ABSS patch   ( 5 - 8 Apr)*

✔ *Release revised upgrade schedule ( 10 Apr)*

✔ *FRB vote on  proceeding with upgrade ( 17 Apr)*

✔ *SAF/AQCK brief Brig Gen Scott ( 18 Apr)*

✔ *Wave One begins (22 Apr 02)*
